

Vishal Prajapati

AI & ML Engineer

 vishalprajapati9427@gmail.com |  +91 9898331569 |  Ahmedabad, India |  Vishal Prajapati |  vishalpr013

AI/ML Engineer with hands-on experience building hybrid **RAG pipelines**, agentic **AI** systems, and **multimodal** deep learning models. Focused on retrieval-augmented generation architecture, **LLM**-powered automation, and applied NLP research. Currently pursuing B.E. in AI-ML at L.D. College of Engineering, Ahmedabad.

EXPERIENCE

AI Research Intern April 2026 – Present
IIT Gandhinagar – LINGO Research Group Gandhinagar, India

- Curated and annotated large-scale research datasets for AI and NLP model training, evaluation, and benchmarking
- Engineered Python automation scripts for systematic collection, processing, and validation of research papers and metadata
- Conducted structured literature reviews, analysing recent publications to inform experiment design and research direction
- Contributed to model benchmarking pipelines and preparation of research publications for peer review

React Developer Intern (AI-Integrated Systems) Aug 2025 – Oct 2025
York IE Remote

- Engineered responsive analytics dashboards using React.js and REST APIs, integrating ML-powered prediction endpoints for data-driven insights.
- Delivered production-ready features across Agile sprints, collaborating through Git-based version control and cross-functional development workflows.

PROJECTS

Hybrid RAG System — AI Research Paper QA Pipeline - Github

FAISS · BM25 · Cross-Encoder · Llama-3.1 · Groq · Python

- Architected hybrid RAG pipeline over 200+ AI research papers combining FAISS dense retrieval + BM25 sparse retrieval with Cross-Encoder reranking for maximum recall and precision
- Implemented grounded question-answering via Llama-3.1 through Groq API, reducing hallucinations compared to single-method retrieval baselines

Jira-AI — Task-to-Code Automator - Github

LLMs · OpenAI API · Jira API · LangChain · Python

- Developed AI assistant that parses Jira tickets, auto-generates technical documentation, and executes development tasks end-to-end
- Automated code generation, testing, and deployment via LLM + API integration — reduced manual developer effort by 40%

Smart Product Pricing — Multimodal Price Predictor

SentenceTransformer · EfficientNet-B3 · XGBoost · Python

- Built multimodal price predictor fusing SentenceTransformer text embeddings + EfficientNet-B3 image features across ~20K products
- Trained XGBoost regressor on concatenated feature vectors — achieved MAE 14.56 / MSE 25.8

TECHNICAL SKILLS

AI/ML: RAG Pipelines, LLM Fine-Tuning, Prompt Engineering, Agentic AI, Groq API, OpenAI API

Frameworks: LangChain, LangGraph, PyTorch, TensorFlow, HuggingFace, scikit-learn

Languages: Python, JavaScript, SQL

Tools: Git, Docker, Firebase, Jupyter, Ollama

ACHIEVEMENTS

York IE Hackathon 2025 - Link

- Won 1st place for building an AI-powered automation system solving a real-world enterprise problem

SSIP Phase 5 Grantee - Link

- Selected for ZeroTrace, an AI-based startup project, under Gujarat Government's Student Startup & Innovation Policy

CERTIFICATIONS

- Generative AI Foundations - Oracle
- Data Science Professional - Oracle
- ML, Deep Learning & NLP - Udemy

EDUCATION

Examination	University / Board	Institute	Year	CPI / %
B.E. (AI & ML)	GTU	L.D. College of Engineering, Ahmedabad	2023 – 2027	8.5 / 10
HSC (12th)	GSEB	DIVINE BUDS SCHOOL	2023	PR - 89.37
